

RESIDENTIAL REBATES

A Touchstone Energy® Cooperative 

NEW HOME CONSTRUCTION

All Star Home \$1,000/home

Requirements:

- Energy-Efficient Home Construction: High performance insulation and windows.
- High Efficiency Heating and Cooling: Requires geothermal, cold climate air-source heat pump or ENERGY STAR® air-source heat pump.
- Efficient Electric Water Heating: Requires the installation of a heat pump water heater or geothermal assisted electric water heater.
- Electric ENERGY STAR appliances for clothes washer, clothes dryer, dishwasher and refrigerator.

CREATE A HEALTHY HOME

Keep it Safe

Properly label and store poisons out of the reach of children. Secure loose rugs and keep play areas free from hard or sharp surfaces. Install smoke and carbon monoxide detectors and keep fire extinguishers on hand.

Keep it Well-ventilated

Ventilate bathrooms and kitchens; consider using whole house ventilation to supply fresh air and reduce the concentration of contaminants in the home.

Keep it Contaminant-free

Reduce lead-related hazards in pre-1978 homes by fixing deteriorated paint, and keeping floors and window areas clean using a wet-cleaning approach. Test your home for radon, a naturally occurring dangerous gas that enters through soil, crawlspaces, and foundation cracks. Install a radon removal system if levels above the EPA action-level are detected.

Thermally Controlled

Houses that do not maintain adequate temperatures increase the risk for inhabitants to be exposed to extreme cold or heat.

WEATHERIZATION

Requirements:

- Rebates based on heating source.
- Home must be built prior to 2000.
- Must be upgraded to existing home (new additions do not qualify).
- Project cost must be \$150 or more (labor costs for self-installed projects cannot be included).

Electric Heat (with or without air conditioning)

| | |
|--------------------------|-----------------|
| Attic/Ceiling Insulation | 60% up to \$600 |
| Wall Insulation | 60% up to \$600 |
| Foundation Insulation | 60% up to \$600 |
| Infiltration Control | 60% up to \$200 |
| Duct Insulation/Sealing | 60% up to \$200 |
| Maximum rebate per home | \$2,200 |

Central AC Only (non-electric heating)

| | |
|--------------------------|-----------------|
| Attic/Ceiling Insulation | 15% up to \$150 |
| Wall Insulation | 15% up to \$150 |
| Maximum rebate per home | \$300 |

LIHEAP Qualified, no LIHEAP covered costs
(Same above requirements apply)

Electric Heat (with or without air conditioning)

| | |
|--------------------------|-----------------|
| Attic/Ceiling Insulation | 80% up to \$800 |
| Wall Insulation | 80% up to \$800 |
| Foundation Insulation | 80% up to \$800 |
| Infiltration Control | 80% up to \$200 |
| Duct Insulation/Sealing | 80% up to \$200 |
| Maximum rebate per home | \$2,800 |

Central AC Only (non-electric heating)

| | |
|--------------------------|-----------------|
| Attic/Ceiling Insulation | 20% up to \$150 |
| Wall Insulation | 20% up to \$150 |
| Maximum rebate per home | \$300 |

EAST-CENTRAL IOWA REC REBATES

Contact the cooperative for the complete list of rebates and qualifications

WATER HEATERS

Heat Pump Water Heater
ENERGY STAR® Integrated Unit
Air-Source Heat Pump Water Heater
\$500/unit

High Efficiency Electric Water Heaters
Electric Resistance Unit
(not less than 40 gal. tank - min. EF ≥ 0.90)
\$75/unit

Geothermal Assisted Storage Unit
(not less than 40 gal. tank - min. EF ≥ 0.90)
\$150/unit

Beneficial Electrification(BE) Incentive
Go Electric Bonus
When a resistance or HPWH unit is replacing a natural gas or LP unit, or for new accounts.
\$100

EV LEVEL II CHARGERS

The cooperative will rebate 50% of the installed cost, up to \$500, for electric vehicle Level II chargers requiring a 240/208 volt input supply. The primary charging location of the EV must be at the home address of the distribution cooperative member.

Contact ECI REC to learn more.

HEATING & COOLING

Heat Plus Rate
Per Home \$100
Per Apartment \$50
Rebate available if member supplies meter socket.

Groundsource Heat Pump
Closed Loop System \$500/ton
Open Loop System \$300/ton
No "pump & dump" systems
Hybrid System with Gas Backup Additional \$50/ton
Unit Replacement \$150/ton

Air-Source Heat Pump, Including Minisplits
Cold Climate Heat Pump \$350/ton
Standard Air-Source Heat Pump \$250/ton
Hybrid Air-Source Heat Pump Bonus \$50/ton

ENERGY STAR Central Air Conditioning
ENERGY STAR qualified \$100/unit
Min. SEER2 15.2 & EER2 12.0
Limit two air conditioner rebates per residence.

Indoor Air Quality
Energy/Heat Recovery Ventilator (ERV/HRV) \$250/unit
Equipment must serve the entire conditioned space of the home.
Limit of two HRVs per home.

ENERGY STAR APPLIANCES

ENERGY STAR Heat Pump Clothes Dryer
ENERGY STAR qualified \$100/unit
ENERGY STAR Electric Clothes Dryer
ENERGY STAR qualified \$20/unit

Have you heard of a heat pump clothes dryer? Heat pump dryers are gentler on clothing, more energy efficient, and can operate at lower drying temperatures than standard dryers.

WHY ELECTRIFY?

Heating is the largest energy use for homes in Iowa and provides the biggest opportunities to save. When properly installed, an ASHP can deliver one and a half to three times more heat energy to a home than the electrical energy it consumes (Source: U.S. Department of Energy).

As a result, some of these systems can provide heat at a higher efficiency and lower cost than electric resistance heating, oil, or propane heating systems—and in some cases, for a lower cost than gas heating as well.

Single Family Home Energy Consumption
